The diagram shows two columns of ten boxes each, representing numbers from 10 to 20. Each box contains a ten-bar (a row of ten small squares) and some boxes also have additional small squares below them. In the center, numbers 10 through 20 are written in boxes. A black double-headed arrow connects the first box (10 bars) to the number 10. Red double-headed arrows connect each box to its corresponding number. Red arrows also cross between the two columns, connecting boxes with the same number. For example, the top-right box (10 bars, 1 small square) is connected to the number 11, and the bottom-right box (20 bars, 5 small squares) is connected to the number 15.
