

~~X / X / 3 /~~

$$\begin{array}{r}
 \textcircled{2} \quad \quad \quad 463 \\
 \times \quad \quad \quad 52 \\
 \hline
 \quad \quad \quad 926 \\
 + 2315 \quad . \\
 \hline
 24076
 \end{array}$$

Diagram illustrating the multiplication process with three steps:

- Step 1:** Multiplication of 463 by 2, resulting in 926.
- Step 2:** Multiplication of 463 by 5, resulting in 2315.
- Step 3:** Addition of the partial products (926 + 23150) to get the final result, 24076.

1 : $2 \times 463 = 926$

2 : $5 \times 463 = 2315$

3 : $926 + 23150 = 24076$
